

The most important file you will ever see

Purpose

To check your printers printable texture range

Instructions

Calibrate your Monitor to 100 Lumens.

Set an Info Palette Readout to HSB to measure Brightness in %'s.

Print the PDF File at 240 dpi with your Printer Profile engaged.

Note at what %'s the blacks & highlights merge in to black and white.

Use these %'s when manipulating shadows and highlights eg. 6% & 98%.
